- Kotlin
- Java
- Python
- XML
- Android Studio
- Git and github
- Firebase
- Team Collaboration
- Active Listening
- Adaptable

LANGUAGES

- English (Fluent)
- Hindi (Fluent)
- German (Intermediate)

PROFILE

Highly motivated and ambitious software engineer seeking an opportunity to kickstart a career in the dynamic world of technology. Possessing a passion for coding, I am eager to apply my theoretical knowledge in a practical world and further develop my skills under the guidance of experienced professionals.

PROJECT

Annapurna - Food Charity App

SEP 2024 - PRESENT

Currently developing 'Annapurna,' a food charity app in Kotlin and Android Studio, featuring user authentication, real-time database integration, map APIs for location tracking, and payment gateways to facilitate seamless donations and volunteer coordination.

Mausam - Weather Forecasting App

DEC 2024

Developed a weather forecasting app called Mausam that integrates with weather API for accurate temperature based on current location.

Tic-Tac-Toe

SEP 2024

Developed a Tic Tac Toe game using Kotlin in Android Studio, implementing responsive UI and game logic to enhance user experience and engagement.

Virse - Chat App

2024 - 2025

Developed a chat app called Virse that ensures secure communication with proper authentication, a real-time database for data storage, and media storage, utilizing Firebase.

EDUCATION

Bachelor of Technology

2022-2026

SRM University

GPA: 8.0/10.0
